

ABSTRACT

In a nutshell, you need a portfolio website to showcase your work. Whether you're an individual, a small team of two or a company of ten people, it's crucial that you have a unique approach. A website Portfolio will help you stand out from the crowd, show your uniqueness, build trust, and make sure that others can find you.

This project aimed to design a web portfolio for a graduating student and report on the process. The project is based on the existing personal visual identity of the student. This paper is created as an instruction for the reader describing the process of personal online portfolio design simply by defining and explaining the main terms and methods used for web design and development.

This thesis work consists of six parts, depending on how the design process proceeded. These parts include research, project management, content development, information gathering, design and an overview of the development process and techniques.

Tech Stack:

HTML : for structure of website

CSS : for styling the website

BootStrap : for designing templates

Having your own website means customers are always able to find you and if interested, reach out for you. If you don't have an online presence nowadays, you are behind the times. A portfolio is a great way for students to present their work online. It reflects your identity through your work.
